

**CS595 Seminar (Winter 2009)
Surface Generation, Interpolation, and
Extrapolation from Multi-views
in Computer Vision & Computer Graphics**

Time: Monday 1pm (first meeting: January 12th)

Place: CS conference room (HFH 1132)

Description: The graduate research seminar will look into the problem of constructing 3D object models. In particular, we will focus our discussion on surface generation, interpolation, and extrapolation from 3D point-cloud data inferred from images and video.
