

Computer Vision Internship Opportunities at IBM Research

IBM T.J. Watson Research Center, Hawthorne, New York

We have summer internship opportunities available in the Exploratory Computer Vision Group at IBM Research. We are looking for self-motivated students with strong background and hands-on experience in computer vision. The student will be working in challenging research projects with particular emphasis in one of the following topics:

- Video Analytics for Smart Surveillance
 - o Crowd Analysis and Tracking
 - o Large Scale Visual Learning
 - o Color Processing for Visual Search
 - o Attribute-based People Search
 - o Abandoned Object Detection
 - o View Adaptation / Online Learning
- Biometrics
 - o Fingerprint/Face/Iris Recognition
 - o Biometrics Fusion
 - o Security and Privacy in Biometrics
 - o Large Scale Biometric Systems
- Computer Vision for Driver Assistance
- Object and Activity Classification in Retail Stores
- Computer Vision for Video Conferencing
 - o Face and Gesture Analysis
 - o Sign Language Recognition

Requirements:

- Hands-on experience and understanding of the state-of-the-art in computer vision research.
- PhD students will have preference, but MSc students will be considered as well.
