

Are you passionate about augmented reality and virtual reality? Do you have what it takes to work with the best in brightest minds in the world? Do you get excited about solving ridiculously hard problems? If so, we want to meet you.

We are an incredibly hard working team within PTC that is ushering in the era of augmented reality. By making AR extremely easy for developers, Vuforia has become the world's leading augmented reality software platform. The Vuforia ecosystem now includes more than 300,000 developers who have developed more than 30,000 applications for phones, tablets, VR Viewers, and a whole new generation of digital eyewear. They are building new experiences that change the way we learn, play, shop and work.

We have offices in some of the most beautiful cities in the world, including San Diego, CA; Vienna, Austria; Cambridge, UK; Zurich, Switzerland; and Modi'in Israel. In addition to the great scenery, PTC also has competitive benefits packages, and we do our best to play as hard as we work.

SENIOR A/V SOFTWARE ENGINEER

Responsibilities:

- Build commercial-grade applications using augmented reality technology on both mobile platforms (Android, iOS, Windows) and servers (Unix/Linux) to be deployed on millions of devices
- Design, prototyping, implementation, and testing of audio and video protocols capable of providing the next level of real-time communication at large scale
- Design, prototyping, implementation, and testing of software components in areas such as general software engineering, human-computer interaction, networking, systems

Background/Skills:

- B.S. in Computer Science or related area
- 5+ years of experience in C/C++ with excellent programming and code understanding skills demonstrated through relevant experience
- Strong background in software development, incl. testing and debugging on mobile platforms
- 3+ years of hands-on experience with A/V codecs, large-scale multimedia streaming, network protocols, RTP, VoIP
- Experience with SIP, HTTP and NAT traversal techniques desired
- Proactive communication and strong problem solving skills

Preferred Requirements:

- M.S. or Ph.D. in Computer Science or related area
- Experience with git, working in development teams of different sizes, working with geographically distributed teams, agile development workflows
- Experience with mobile application development for Android and/or iOS; OpenGL ES
- Exposure to computer vision and human-computer interaction

What we offer

- Work in a world-class development team in a dynamic environment.
- Contribute to leading edge technology with the potential to be deployed in millions of devices
- A fascinating, flexible, and fun work environment

WHY JOIN PTC?

PTC is a great place to work. Our culture is one of excellence, innovation, empowerment, and caring about our customers, communities, and employees. We have built an action oriented culture of integrity and trust, creating a sense of team spirit at both the departmental and company-wide level.
